

# What is Digital TV

The DTTV (Digital Terrestrial Television) Project is part of the national agenda under the auspices of Ministry of Communication and Multimedia Malaysia (KKMM), and managed by the Malaysian Communications and Multimedia Commission (MCMC).

Malaysians can receive the myFreeview digital TV broadcast by connecting a decoder and *Ultra High Frequency* (UHF) aerial to an existing TV set or via a UHF aerial and IDTV that comes with a built-in decoder.

## Benefits of TV Digital

**Free – no subscription fee**

**Sharper and clearer image**

**High-quality audio**

**Enhancement to service and TV channels**

**Interactive TV services**

**Multi-lingual subtitles**

**Access to Electronic Programme Guide**

## myFreeview Channels

## How to get the myFreeview Service

Connect the DVB-T2 decoder to your existing tv set using AV/HDMI cable, and the UHF aerial to aerial terminal of your tv

Connect the UHF aerial to aerial terminal of your IDTV

*\*New TV sets with DTTV label/stamp duly certified by SIRIM that come with a built-in digital tuner, or known as IDTV (Integrated Digital Television) can directly access the myFreeview digital channels without requiring the DVB-T2 decoder.*

You can identify an IDTV through the DTTV label found on all genuine IDTV, and at all certified distributors.
